

◆ Übersicht mit KI

"Attenuated horseradish" refers to a concept proposed by **Dr. Günter Valet** as part of "molecule-oriented home medicine" for older adults. It is positioned as a preventative approach to enhance health in higher age, specifically for its potential anti-infective properties, supporting hair growth, aiding gingiva regeneration, and combating essential fatty acid deficiency. www.classimed.de +1

Key details about Valet's concept:

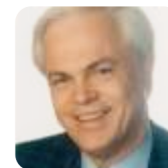

- **Purpose:** It is used as a daily component to maintain health and combat age-related decline.
- **Applications:** Specifically mentioned for its role in reducing infections and improving skin/hair health.
- **Context:** This falls under "Molecule oriented home medicine" (MOHM). www.classimed.de +2

Günter Valet is associated with studies in immunology and metabolism, including topics like SARS-CoV-2 (Corona) prevention, sarcopenia, and mycosis. www.classimed.de +1
